ABOUT ME

A passionate Web Developer (MERN focused) with 2 years of self-learning. Currently working on a project named **Doctor's Portal** where patient or doctor can create free account. Patient can appoint a doctor according his need through online. After his *payment* doctor will give him a schedule to meet. Meet can be online or offline. Doctor will inform the patient according his schedule. Doctors Identity will be checked through his *Reg. No.* Currently trying to make this more efficient to check if the doctor is really expert or not. You can see the project details in my portfolio below.

WORK EXPERINCES

- Completed Internship at BJIT, Dhaka (2022 January)
